6A error analysis (2012)

Student No.: 01 Name: _____ Marks: / 81

Class: 6A Date: _____ Marked date: _____

What have you learned in this chapter? _____

What can you do to improve your work next time? _____

1. Simplify $\frac{m^{-12}n^8}{n^3}$ and express your answer with positive indices. (3 marks) (DSE-2012 PI Q01)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

2. There are 132 guards in an exhibition centre consisting of 6 zones. Each zone has the same number of guards. In each zone, there are 4 more female guards than male guards. Find the number of male guards in the exhibition centre. (4 marks) (DSE-2012 PI Q05)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

3. In Figure 1, AB, BC, CD and AD are chords of the circle. AC and BD intersect at E. It is given that $BE = 8$ cm, $CE = 20$ cm and $DE = 15$ cm.

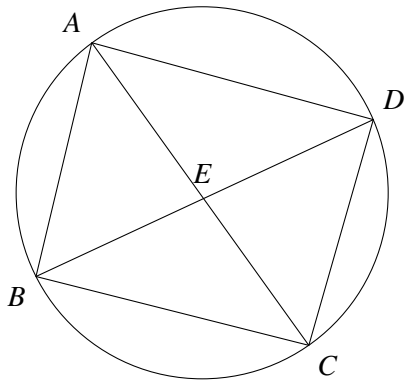

Figure 1

(a) Write down a pair of similar triangles in Figure 1. Also find AE.

(b) Suppose that $AB = 10$ cm. Are AC and BD perpendicular to each other? Explain your answer.

(5 marks) (DSE-2012 PI Q08)

Answers written in the margins will not be marked.

4. In Figure 2, the volume of the solid right prism $ABCDEFGH$ is $1\,020\ \text{cm}^3$. The base $ABCD$ of the prism is a trapezium, where AD is parallel to BC. It is given that $\angle BAD = 90°$, $AB = 12$ cm, $BC = 6$ cm and $DE = 10$ cm.

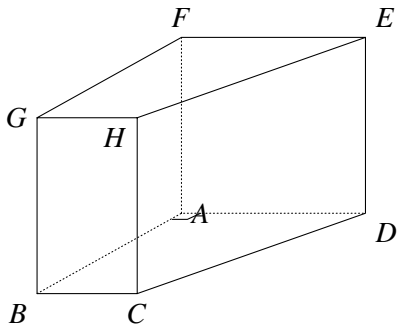

Figure 2

Find

(a) the length of AD,

(b) the total surface area of the prism $ABCDEFGH$.

(5 marks) (DSE-2012 PI Q09)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

5. Let \$C be the cost of painting a can of surface area A m^2. It is given that C is the sum of two parts, one part is a constant and the other part varies as A. When $A = 2$, $C = 62$; when $A = 6$, $C = 74$.

(a) Find the cost of painting a can of surface area 13 m^2.

(b) There is a larger can which is similar to the can described in (a). If the volume of the larger can is 8 times that of the can described in (a), find the cost of painting the larger can.

(6 marks) (DSE-2012 PI Q11)

6. (a) Figure 3(a) shows a solid metal right circular cone of base radius 48 cm and height 96 cm.

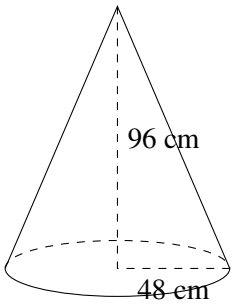

Figure 3(a)

Find the volume of the circular cone in terms of π.

(b) A hemispherical vessel of radius 60 cm is held vertically on a horizontal surface. The vessel is fully filled with milk.

(i) Find the volume of the milk in the vessel in terms of π.

(ii) The circular cone is now held vertically in the vessel as shown in Figure 3(b).

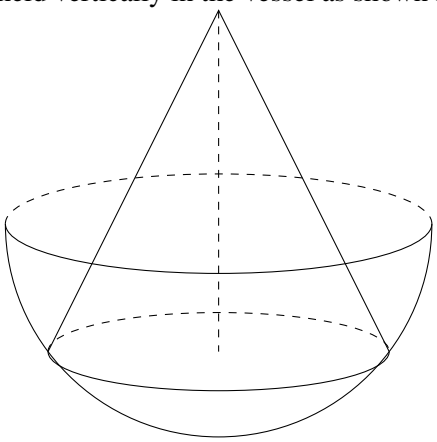

Figure 3(b)

A craftsman claims that the volume of the milk remaining in the vessel is greater than 0.3 m^3. Do you agree? Explain your answer.

(7 marks) (DSE-2012 PI Q12)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

7. (a) Find the value of k such that $x-2$ is a factor of $kx^3-21x^2+24x-4$.

(b) Figure 4 shows the graph of $y=15x^2-63x+72$. Q is a variable point on the graph in the first quadrant. P and R are the feet of the perpendiculars from Q to the x-axis and the y-axis respectively.

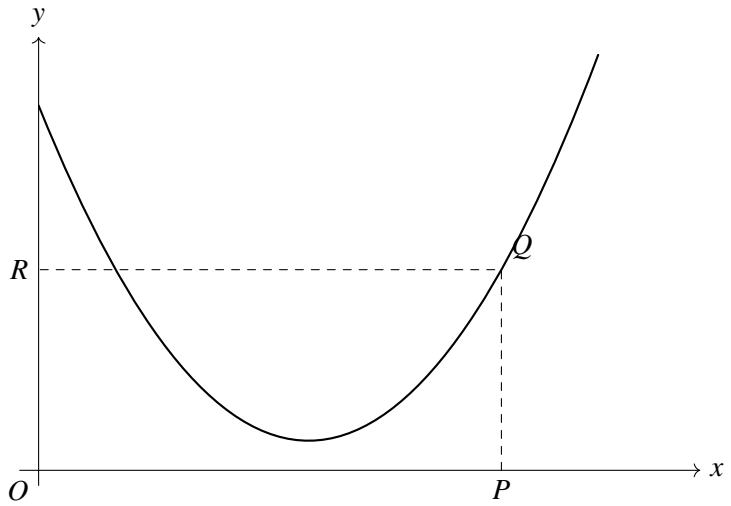

Figure 4

(i) Let $(m,0)$ be the coordinates of P. Express the area of the rectangle $OPQR$ in terms of m.

(ii) Are there three different positions of Q such that the area of the rectangle $OPQR$ is 12? Explain your answer.

(7 marks) (DSE-2012 PI Q13)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

8. The y-intercepts of two parallel lines L and ℓ are -1 and -3 respectively and the x-intercept of L is 3. P is a moving point in the rectangular coordinate plane such that the perpendicular distance from P to L is equal to the perpendicular distance from P to ℓ. Denote the locus of P by Γ.

(a) (i) Describe the geometric relationship between Γ and L.

(ii) Find the equation of Γ.

(b) The equation of the circle C is $(x-6)^2+y^2=4$. Denote the centre of C by Q.

(i) Does Γ pass through Q? Explain your answer.

(ii) If L cuts C at A and B while Γ cuts C at H and K, find the ratio of the area of $\triangle AQH$ to the area of $\triangle BQK$.

(9 marks) (DSE-2012 PI Q14)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

9. The standard deviation of the test scores obtained by a class of students in a Mathematics test is 10 marks. All the students fail in the test, so the test score of each student is adjusted such that each score is increased by 20% and then extra 5 marks are added.

(a) Find the standard deviation of the test scores after the score adjustment.

(b) Is there any change in the standard score of each student due to the score adjustment? Explain your answer.

(3 marks) (DSE-2012 PI Q15)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

10. There are 8 departments in a company. To form a task group of 16 members, 2 representatives are nominated by each department. From the task group, 4 members are randomly selected.

(a) Find the probability that the 4 selected members are nominated by 4 different departments.

(b) Find the probability that the 4 selected members are nominated by at most 3 different departments.

(4 marks) (DSE-2012 PI Q16)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

11. The coordinates of the centre of the circle C are $(6, 10)$. It is given that the x-axis is a tangent to C.

(a) Find the equation of C.

(b) The slope and the y-intercept of the straight line L is -1 and k respectively. If L cuts C at A and B, express the coordinates of the mid-point of AB in terms of k.

(7 marks) (DSE-2012 PI Q17)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

12. Figure 5(a) shows a right pyramid $VABCD$ with a square base, where $\angle VAB = 72°$. The length of a side of the base is 20 cm. Let P and Q be the points lying on VA and VD respectively such that PQ is parallel to BC and $\angle PBA = 60°$. A geometric model is made by cutting off the pyramid $VPBCQ$ from $VABCD$ as shown in Figure 5(b).

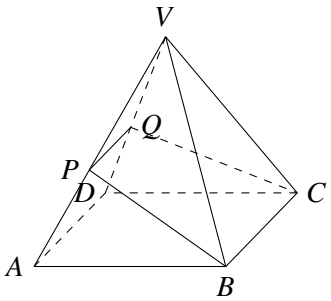

Figure 5(a)

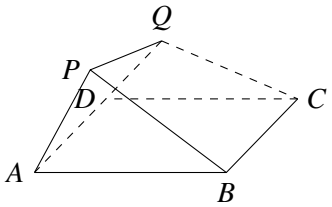

Figure 5(b)

(a) Find the length of AP.

(b) Let α be the angle between the plane $PBCQ$ and the base $ABCD$.

(i) Find α.

(ii) Let β be the angle between PB and the base $ABCD$. Which one of α and β is greater? Explain your answer.

(8 marks) (DSE-2012 PI Q18)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

13. In a city, the air cargo terminal X of an airport handles goods of weight $A(n)$ tonnes in the nth year since the start of its operation, where n is a positive integer. It is given that $A(n) = ab^{2n}$, where a and b are positive constants. It is found that the weights of the goods handled by X in the 1st year and the 2nd year since the start of its operation are 254 100 tonnes and 307 461 tonnes respectively.

(a) (i) Find a and b. Hence find the weight of the goods handled by X in the 4th year since the start of its operation.

(ii) Express, in terms of n, the total weight of the goods handled by X in the first n years since the start of its operation.

(b) The air cargo terminal Y starts to operate since X has been operated for 4 years. Let $B(m)$ tonnes be the weight of the goods handled by Y in the mth year since the start of its operation, where m is a positive integer. It is given that $B(m) = 2ab^m$.

(i) The manager of the airport claims that after Y has been operated, the weight of the goods handled by Y is less than that handled by X in each year. Do you agree? Explain your answer.

(ii) The supervisor of the airport thinks that when the total weight of the goods handled by X and Y since the start of the operation of X exceeds 20 000 000 tonnes, new facilities should be installed to maintain the efficiency of the air cargo terminals. According to the supervisor, in which year since the start of the operation of X should the new facilities be installed?

(13 marks) (DSE-2012 PI Q19)
