6A error analysis (2012)

Student No.: 09 Name: _____ Marks: / 60

Class: 6A Date: _____ Marked date: _____

What have you learned in this chapter? _____

What can you do to improve your work next time? _____

1. The length of a piece of thin string is measured as 25 m correct to the nearest m. If the string is cut into n pieces such that the length of each piece is measured as 5 cm correct to the nearest cm, find the greatest possible value of n.

   A. 445

   B. 566

   C. 567

   D. 650

(DSE-2012 PII Q14)

2. $\dfrac{\cos 60^\circ}{1-\cos(90^\circ-\theta)} + \dfrac{\cos 240^\circ}{1-\cos(270^\circ-\theta)} =$

A. $\dfrac{1}{\cos^2\theta}$

B. $\dfrac{\cos\theta}{\tan\theta}$

C. $\dfrac{\tan\theta}{\cos\theta}$

D. $\dfrac{1}{\cos\theta\tan\theta}$

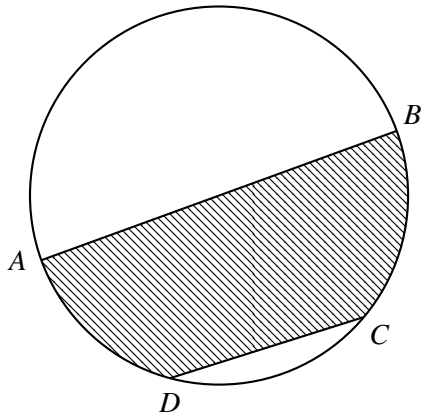

(DSE-2012 PII Q19)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

3. In the figure, AB is a diameter of the circle $ABCD$. If $AB = 12$ cm and $CD = 6$ cm, then the area of the shaded region is

A. $(12\pi - 9)$ cm^2.

B. $(12\pi + 9)$ cm^2.

C. $(12\pi - 9\sqrt{3})$ cm^2.

D. $(12\pi + 9\sqrt{3})$ cm^2.

(DSE-2012 PII Q21)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

4. Which of the following statements about a regular 12-sided polygon are true?

I. Each exterior angle is 30°.

II. Each interior angle is 150°.

III. The number of axes of reflectional symmetry is 6.

A. I and II only

B. I and III only

C. II and III only

D. I, II and III

(DSE-2012 PII Q22)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

5. The rectangular coordinates of the point P are $(-3, -3\sqrt{3})$. If P is rotated anticlockwise about the origin through $90°$, then the polar coordinates of its image are

A. $(3, 150°)$.

B. $(3, 330°)$.

C. $(6, 150°)$.

D. $(6, 330°)$.

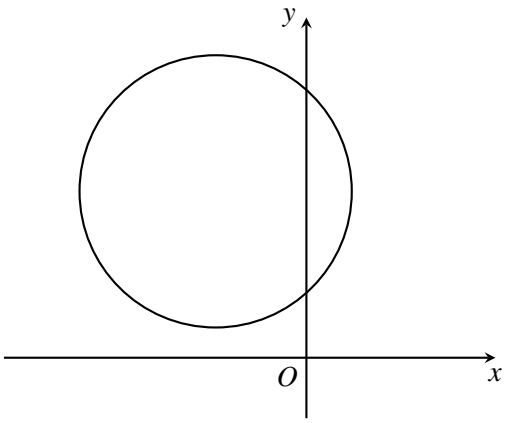

(DSE-2012 PII Q23)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

6. In the figure, the radius of the circle and the coordinates of the centre are r and (h,k) respectively. Which of the following are true?

I. $h+k>0$

II. $r-h>0$

III. $r-k>0$

A. I and II only

B. I and III only

C. II and III only

D. I, II and III

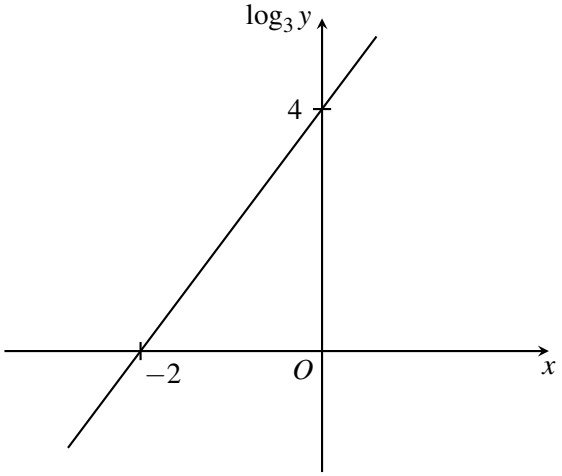

(DSE-2012 PII Q26)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

7. The graph in the figure shows the linear relation between x and $\log_3 y$. If $y = mn^x$, then $n =$

A. $\frac{1}{81}$.

B. $\frac{1}{9}$.

C. 9.

D. 81.

9. Let $f(x)$ be a quadratic function. If the coordinates of the vertex of the graph of $y = f(x)$ are $(3, -4)$, which of the following must be true?

A. The roots of the equation $f(x) = 0$ are integers.

B. The roots of the equation $f(x) - 3 = 0$ are rational numbers.

C. The roots of the equation $f(x) + 4 = 0$ are real numbers.

D. The roots of the equation $f(x) + 5 = 0$ are nonreal numbers.

10. The figure shows a shaded region (including the boundary). If (h,k) is a point lying in the shaded region, which of the following are true?

I. $k \geq 3$

II. $h - k \geq -3$

III. $2h + k \leq 6$

A. I and II only

B. I and III only

C. II and III only

D. I, II and III

11. Let a_n be the nth term of an arithmetic sequence. If $a_{18} = 26$ and $a_{23} = 61$, which of the following are true?

I. $a_{14} < 0$

II. $a_1 - a_2 < 0$

III. $a_1 + a_2 + a_3 + \cdots + a_{27} > 0$

A. I and II only

B. I and III only

C. II and III only

D. I, II and III

Answers written in the margins will not be marked.

13. In the figure, PQ is the tangent to the circle ABC at O, where O is the centre of the semicircle PBQ. It is given that BCP is a straight line. If $\angle BPQ = 12°$, then $\angle BAC =$

A. 18°.

B. 24°.

C. 36°.

D. 54°.

14. Find the range of values of k such that the circle $x^2+y^2+2x-4y-13=0$ and the straight line $x-y+k=0$ intersect at two distinct points.

A. $-9<k<3$

B. $-3<k<9$

C. $k<-9$ or $k>3$

D. $k<-3$ or $k>9$

Answers written in the margins will not be marked.

15. A box contains six balls numbered 7, 8, 8, 9, 9 and 9 respectively. John repeats drawing one ball at a time randomly from the box without replacement until the number drawn is 9. Find the probability that he needs exactly three draws.

A. $\frac{1}{2}$

B. $\frac{1}{6}$

C. $\frac{1}{8}$

D. $\frac{3}{20}$

(DSE-2012 PII Q44)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

16. Tom conducts a survey on the numbers of hours spent on doing homework in a week by secondary students. Questionnaires are sent out and twenty of them are returned. The stem-and-leaf diagram below shows the numbers of hours recorded in the twenty questionnaires:

Stem (tens)	Leaf (units)
1	0 0 1 1 2 3 4 5 5 6 6 7 7
2	0 0 0 5 8
3	4 6

(a) Find the mean and the median of the numbers of hours recorded in the twenty questionnaires.

(b) Tom receives four more questionnaires. He finds that the mean of the numbers of hours recorded in these four questionnaires is 18. It is found that the numbers of hours recorded in two of these four questionnaires are 19 and 20.

(i) Write down the mean of the numbers of hours recorded in the twenty-four questionnaires.

(ii) Is it possible that the median of the numbers of hours recorded in the twenty-four questionnaires is the same as the median found in (a)? Explain your answer.

(6 marks) (DSE-2012 PI Q10)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

17. The standard deviation of the test scores obtained by a class of students in a Mathematics test is 10 marks. All the students fail in the test, so the test score of each student is adjusted such that each score is increased by 20% and then extra 5 marks are added.

(a) Find the standard deviation of the test scores after the score adjustment.

(b) Is there any change in the standard score of each student due to the score adjustment? Explain your answer.

Answers written in the margins will not be marked.

18. Figure 5(a) shows a right pyramid $VABCD$ with a square base, where $\angle VAB = 72°$. The length of a side of the base is 20 cm. Let P and Q be the points lying on VA and VD respectively such that PQ is parallel to BC and $\angle PBA = 60°$. A geometric model is made by cutting off the pyramid $VPBCQ$ from $VABCD$ as shown in Figure 5(b).

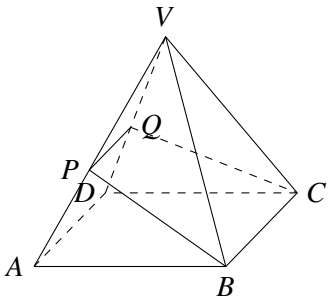

Figure 5(a)

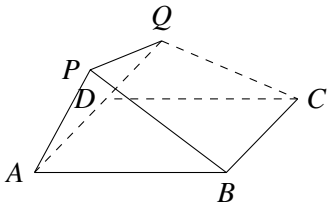

Figure 5(b)

(a) Find the length of AP.

(b) Let α be the angle between the plane $PBCQ$ and the base $ABCD$.

(i) Find α.

(ii) Let β be the angle between PB and the base $ABCD$. Which one of α and β is greater? Explain your answer.

(8 marks) (DSE-2012 PI Q18)

Answers written in the margins will not be marked.

19. In a city, the air cargo terminal X of an airport handles goods of weight $A(n)$ tonnes in the nth year since the start of its operation, where n is a positive integer. It is given that $A(n) = ab^{2n}$, where a and b are positive constants. It is found that the weights of the goods handled by X in the 1st year and the 2nd year since the start of its operation are 254 100 tonnes and 307 461 tonnes respectively.

(a) (i) Find a and b. Hence find the weight of the goods handled by X in the 4th year since the start of its operation.

(ii) Express, in terms of n, the total weight of the goods handled by X in the first n years since the start of its operation.

(b) The air cargo terminal Y starts to operate since X has been operated for 4 years. Let $B(m)$ tonnes be the weight of the goods handled by Y in the mth year since the start of its operation, where m is a positive integer. It is given that $B(m) = 2ab^m$.

(i) The manager of the airport claims that after Y has been operated, the weight of the goods handled by Y is less than that handled by X in each year. Do you agree? Explain your answer.

(ii) The supervisor of the airport thinks that when the total weight of the goods handled by X and Y since the start of the operation of X exceeds 20 000 000 tonnes, new facilities should be installed to maintain the efficiency of the air cargo terminals. According to the supervisor, in which year since the start of the operation of X should the new facilities be installed?
