HHCKLA Buddhist Leung Chik Wai College

6A error analysis (2024)

Student No.: 13 Name: _____ Marks: / 113

Class: 6A Date: _____ Marked date: _____

What have you learned in this chapter? _____

What can you do to improve your work next time? _____

1. Factorize

   (a) $6r^2 - 13rs - 28s^2$,

   (b) $4r - 14s + 6r^2 - 13rs - 28s^2$.

(3 marks) (DSE-2024 PI Q03)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

2. (a) Find the range of values of x which satisfy both $\frac{5x+7}{4} - 1 < 2x$ and $3x + 9 \geq 0$.

(b) Write down the least integer satisfying both inequalities in (a).

(4 marks) (DSE-2024 PI Q04)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

3. It is given that $g(x)$ is partly constant and partly varies as x. Suppose that $g(-3) = -21$ and $g(7) = 9$.

(a) Find $g(x)$. (3 marks)

(b) Let $h(x) = xg(x) + k$, where k is a real constant. If all the roots of the equation $h(x) = 0$ are real numbers, find the range of values of k. (3 marks)

(6 marks) (DSE-2024 PI Q10)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

4. The stem-and-leaf diagram below shows the distribution of the numbers of hours spent on reading journals in a month by a group of researchers.

Stem (tens)	Leaf (units)
2	0 0 1 a a a 8 8 9 9
3	0 0 2 3 4 4 7 9
4	0 b

The mean of the distribution is 30 .

(a) Find a and b . (3 marks)

(b) Write down the least possible range of the distribution. (1 mark)

(c) Find the greatest possible inter-quartile range of the distribution. (3 marks)

(7 marks) (DSE-2024 PI Q11)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

5. Denote the origin by O.

(a) A and B are points lying on the positive x-axis such that the x-coordinate of A is greater than the x-coordinate of B. A vertical line which passes through B cuts the straight line $y = mx$ at the point C such that $AB = BC$, where m is a positive constant. Let D be a point such that $ABCD$ is a square. Express the slope of OD in terms of m. (3 marks)

(b) The coordinates of the points M and N are $(6, 5)$ and $(10, 0)$ respectively. Let P and Q be points lying on OM and MN respectively while R and S be points lying on the x-axis. If the quadrilateral $PQRS$ is a square, find the x-coordinate of P. (4 marks)

(7 marks) (DSE-2024 PI Q12)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

6. The base of a solid right pyramid is a square of side 64 cm. The height of the pyramid is 24 cm. The pyramid is divided into a frustum X and a pyramid Y by a plane which is parallel to its base. It is given that the height of Y is 18 cm.

(a) Find the volume of X. (3 marks)

(b) The base of another solid right pyramid is a square. This pyramid is divided into a frustum Z and a pyramid by a plane which is parallel to its base. The height and the total surface area of Z are 3 cm and 960 cm^2 respectively. Are X and Z similar? Explain your answer. (4 marks)

(7 marks) (DSE-2024 PI Q13)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

7. It is given that $\log_9 y$ is a linear function of $\log_3 x$. Denote the graph of the linear function by L. The slope of L is 4 and L passes through the point $(5, 22)$. Express y in terms of x. (3 marks) (DSE-2024 PI Q15)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

8. In a bag, there are 16 red cups and 4 white cups. If 5 cups are randomly drawn from the bag at the same time, find

(a) the probability that exactly 1 white cup is drawn; (2 marks)

(b) the probability that at most 3 red cups are drawn. (2 marks)

(4 marks) (DSE-2024 PI Q16)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

9. The coordinates of the points Q and R are $(10, -1)$ and $(-4, -9)$ respectively.

(a) Let P be a moving point in the rectangular coordinate plane such that $PQ = PR$. Denote the locus of P by Γ.

(i) Describe the geometric relationship between Γ and QR.

(ii) Find the equation of Γ. (3 marks)

(b) Let C be the circle which passes through Q, R and the point $(4, 3)$.

(i) Find the equation of C.

(ii) The coordinates of the point U are $(10, 4)$. It is found that U lies outside C. UV and UW are the tangents to C at the points V and W respectively. Is the area of the circumcircle of $\triangle UVW$ greater than 100? Explain your answer. (5 marks)

(8 marks) (DSE-2024 PI Q17)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

10. (a) $PQRS$ is a thin quadrilateral metal sheet, where $PQ = 12\,\text{cm}$, $PS = 10\,\text{cm}$, $QR = 13\,\text{cm}$, $\angle QPS = 82^\circ$ and $\angle QRS = 65^\circ$. Find

(i) the length of QS,

(ii) $\angle RQS$. (4 marks)

(b) The metal sheet $PQRS$ described in (a) is now folded along QS (see Figure 2). It is given that the angle between the plane PQS and the plane QRS is 80°.

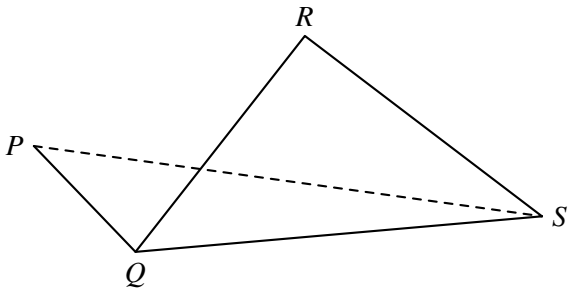

Figure 2

(i) Find the shortest distance from R to the plane PQS.

(ii) Let X be any point lying on the plane QRS. Someone claims that the distance between P and X exceeds $8\,\text{cm}$. Is the claim correct? Explain your answer. (4 marks)

(8 marks) (DSE-2024 PI Q18)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

11. Let $f(x) = 2x^2 + 4mx + 8x + 2m^2 + 8m + n$, where m and n are real constants such that $mn < 0$. Denote the vertex of the graph of $y = f(x)$ by P.

(a) Using the method of completing the square, express the coordinates of P in terms of m and n. (2 marks)

(b) Describe the geometric meaning represented by transforming $f(x)$ to $f\left(\frac{x}{5}\right) + 7$. (2 marks)

(c) Denote the vertex of the graph of $y = f\left(\frac{x}{5}\right) + 7$ by Q. Let (a_1, b_1) and (a_2, b_2) be the coordinates of P and Q respectively. It is given that a_1, $1 + n$, a_2 is an arithmetic sequence and b_1, $4 - m$, b_2 is a geometric sequence.

(i) Find the coordinates of P and Q.

(ii) The coordinates of the points R and S are $(3t + 27, t)$ and $(3t + 3, 2t - 3)$ respectively, where t is a real number. Is it possible that $PQRS$ is a rhombus? Explain your answer. (8 marks)

(12 marks) (DSE-2024 PI Q19)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

12. If a, b and c are non-zero constants such that $4x^2 + 2ax + 3a = x(4x + b) + 2c$, then $a : b : c =$

A. $2 : 4 : 3$.

B. $3 : 4 : 2$.

C. $4 : 6 : 3$.

D. $6 : 4 : 3$.

(2 marks) (DSE-2024 PII Q06)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

13. Let m be a constant. Solve the equation $x^2 - 3x = (m-1)^2 - 3(m-1)$.

A. $x = m - 1$ or $x = m - 4$

B. $x = m - 1$ or $x = 4 - m$

C. $x = 1 - m$ or $x = m - 4$

D. $x = 1 - m$ or $x = 4 - m$

(2 marks) (DSE-2024 PII Q07)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

14. Let $g(x) = (x+1)(x+a)$, where a is a constant. If $g(1) = g(2)$, then $g(a) =$

A. -4.

B. 0.

C. 12.

D. 24.

(2 marks) (DSE-2024 PII Q08)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

15. A car travels at an average speed of 60 km/h for 18 minutes and then the car travels at an average speed of 40 km/h for 27 minutes. The average speed of the car for the whole journey is

A. 48 km/h.

B. 50 km/h.

C. 52 km/h.

D. 54 km/h.

(2 marks) (DSE-2024 PII Q12)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

16. The ratio of the height of a right circular cylinder to the height of a right circular cone is 32 : 15 while the ratio of the volume of the circular cylinder to the volume of the circular cone is 10 : 9. If the base radius of the circular cylinder is 25 cm, then the base radius of the circular cone is

A. 20 cm.

B. 24 cm.

C. 48 cm.

D. 60 cm.

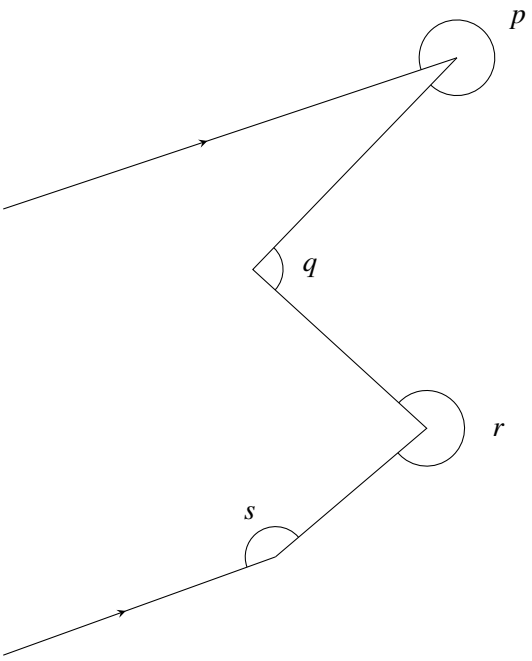

(2 marks) (DSE-2024 PII Q16)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

17. According to the figure, which of the following must be true?

A. $p+q-r=90^\circ$

B. $p-r+s=180^\circ$

C. $p+q-r+s=270^\circ$

D. $p+q+r-s=540^\circ$

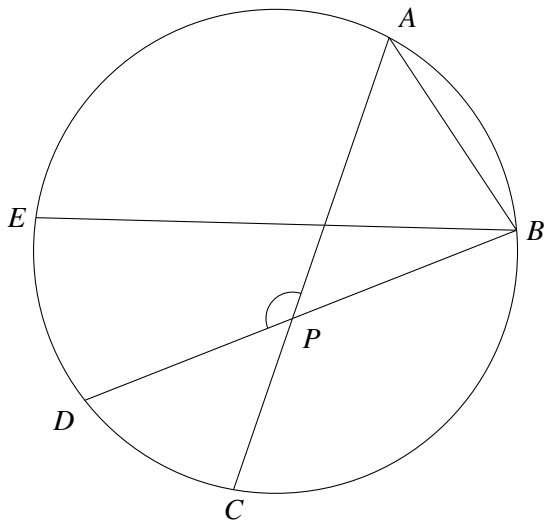

(2 marks) (DSE-2024 PII Q19)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

18. In the figure, $ABCD$ is a circle. AC and BE are diameters of the circle. Let P be the point of intersection of AC and BD. If $\angle ABE = 46^\circ$ and $\angle DBE = 16^\circ$, then $\angle APD =$

A. 104°.

B. 108°.

C. 120°.

D. 135°.

(2 marks) (DSE-2024 PII Q22)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

19. The coordinates of the point U are $(-3, -8)$. U is rotated anticlockwise about the origin through $90°$ to the point V. V is then reflected with respect to the straight line $x = 2$ to the point W. Find the x-coordinate of W.

A. -4

B. -3

C. 7

D. 12

(2 marks) (DSE-2024 PII Q24)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

20. The coordinates of the points A and B are $(-3, 1)$ and $(-7, -5)$ respectively. If P is a point lying on the straight line $x - y + 13 = 0$ such that $AP = PB$, then the y-coordinate of P is

A. -11.

B. -2.

C. 2.

D. 11.

(2 marks) (DSE-2024 PII Q25)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

21. Denote the circle $3x^2 + 3y^2 - 6x + 12y - 4 = 0$ by C. Which of the following are true?

I. The origin lies inside C.

II. The circumference of C is less than 16.

III. The perpendicular distance from the centre of C to the x-axis is 2.

A. I and II only

B. I and III only

C. II and III only

D. I, II and III

(2 marks) (DSE-2024 PII Q27)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

22. Two numbers are randomly drawn at the same time from six cards numbered 1, 2, 3, 4, 5 and 6 respectively. Find the probability that the product of the numbers drawn is not less than 12.

A. $\frac{1}{3}$

B. $\frac{2}{3}$

C. $\frac{7}{15}$

D. $\frac{8}{15}$

(2 marks) (DSE-2024 PII Q28)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

23. Consider the following positive integers:

$$5 \quad 5 \quad 5 \quad 6 \quad 9 \quad 9 \quad 11 \quad 13 \quad m \quad n$$

Let p, q and r be the standard deviation, the mode and the median of the above positive integers respectively. If the mean of the above positive integers is 7, which of the following must be true?

I. $p > 3$

II. $q = 5$

III. $r < 7$

A. I and II only

B. I and III only

C. II and III only

D. I, II and III

(2 marks) (DSE-2024 PII Q30)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

24. If $x = \log_2 y - 2$ and $(\log_2 y)^2 = 5\log_2 y + x - 7$, then $y =$

A. 1.

B. 8.

C. 1 or 3.

D. 3 or 8.

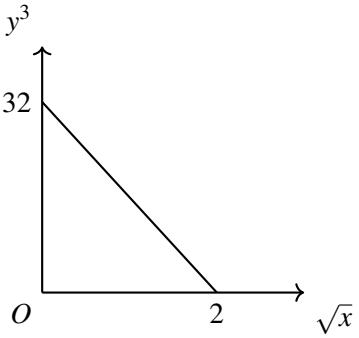

(2 marks) (DSE-2024 PII Q33)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

25. The graph in the figure shows the linear relation between y^3 and $\sqrt{x}$. If $x = 36$, then $y =$

A. -64.

B. -16.

C. -8.

D. -4.

(2 marks) (DSE-2024 PII Q34)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

26. Let $z = (a-5)i + \dfrac{(a+2)i}{2+i}$. If a and z are real numbers, then $a - z =$

A. 2.

B. 3.

C. 4.

D. 5.

(2 marks) (DSE-2024 PII Q35)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

27. The sum of the first n terms of a sequence is $n(2n+3)$. Which of the following are true?

I. 14 is a term of the sequence.

II. The nth term of the sequence is $4n+1$.

III. The sequence is an arithmetic sequence.

A. I and II only

B. I and III only

C. II and III only

D. I, II and III

(2 marks) (DSE-2024 PII Q36)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

28. Consider the following system of inequalities:

$$\begin{cases} x - 2y \leq 1 \\ x + 4y \leq 13 \\ 2x - y \geq -1 \end{cases}$$

Let R be the region which represents the solution of the above system of inequalities. Find the constant c such that the least value of $5x - 2y + c$ is 22, where (x, y) is a point lying in R.

A. 1

B. 23

C. 25

D. 29

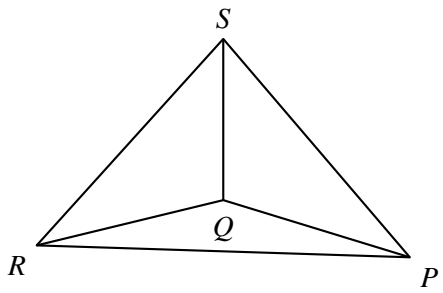

(2 marks) (DSE-2024 PII Q37)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

29. In the figure, the base PQR of the tetrahedron $PQRS$ lies on the horizontal ground. It is given that Q is vertically below S. If $\angle PQR = 90°$, $\angle QPS = 30°$ and $\angle QRS = 45°$, then $\cos\angle PRS =$

A. $\frac{1}{2}$.

B. $\frac{3}{4}$.

C. $\frac{\sqrt{2}}{4}$.

D. $\frac{\sqrt{3}}{6}$.

(2 marks) (DSE-2024 PII Q40)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

30. Let G, H, I and J be the centroid, the orthocentre, the in-centre and the circumcentre of $\triangle PQR$ respectively. If $\angle PQR = \angle PRQ = 22°$, which of the following are true?

I. G lies inside $\triangle PQR$.

II. H lies outside $\triangle PQR$.

III. I, J and Q are collinear.

A. I and II only

B. I and III only

C. II and III only

D. I, II and III

(2 marks) (DSE-2024 PII Q41)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

31. A queue is formed by 2 managers and 7 officers. If no managers are next to each other, how many different queues can be formed?

A. 80 640

B. 141 120

C. 282 240

D. 362 880

(2 marks) (DSE-2024 PII Q42)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

32. There are three questions in a test. The probabilities that a student answers the first question correctly, the second question correctly and the third question correctly are 0.6, 0.7 and 0.8 respectively. Find the probability that the student answers at least 1 question correctly in this test.

A. 0.024

B. 0.188

C. 0.812

D. 0.976

(2 marks) (DSE-2024 PII Q43)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

33. In an examination, the scores (in marks) of the candidates are as follows:

39 10 13 16 17 19 25 26 28 30 30 32

Which of the following is/are true?

I. The median of the examination scores of the candidates is 22 marks.

II. The standard score of each candidate in the examination is lower than 2.

III. The standard deviation of the examination scores of the candidates exceeds 8 marks.

A. I only

B. II only

C. I and III only

D. II and III only

(2 marks) (DSE-2024 PII Q44)

I can finish _____ questions

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.
