HHCKLA Buddhist Leung Chik Wai College

6A error analysis (2012)

Student No.: 14 Name: _____ Marks: / 55

Class: 6A Date: _____ Marked date: _____

What have you learned in this chapter? _____

What can you do to improve your work next time? _____

1. The rectangular coordinates of the point P are $(-3, -3\sqrt{3})$. If P is rotated anticlockwise about the origin through $90°$, then the polar coordinates of its image are

   A. $(3, 150°)$.

   B. $(3, 330°)$.

   C. $(6, 150°)$.

   D. $(6, 330°)$.

2. In the figure, the equations of the straight lines L_1 and L_2 are $ax+y=b$ and $cx+y=d$ respectively. Which of the following are true?

I. $a<0$

II. $a<c$

III. $b>d$

IV. $ad>bc$

A. I, II and III only

B. I, II and IV only

C. I, III and IV only

D. II, III and IV only

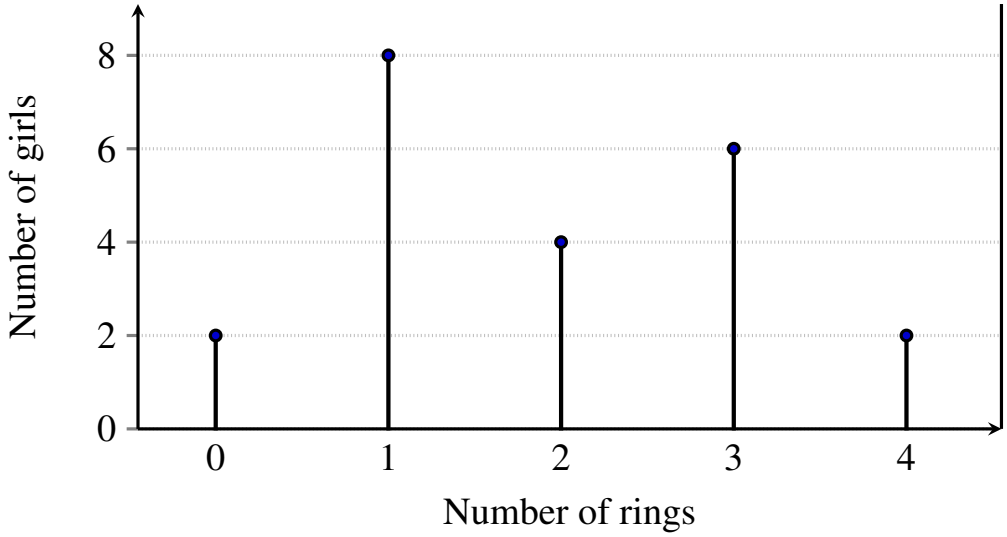

(DSE-2012 PII Q25)

Answers written in the margins will not be marked.

3. The bar chart below shows the distribution of the numbers of rings owned by the girls in a group. Find the standard deviation of the distribution correct to 2 decimal places.

A. 1.04

B. 1.16

C. 1.19

D. 2.09

(DSE-2012 PII Q29)

4. Consider the following data:

$$19 \quad 10 \quad 12 \quad 12 \quad 13 \quad 13 \quad 14 \quad 15 \quad 16 \quad m \quad n$$

If both the mean and the median of the above data are 14, which of the following are true?

I. $m \geq 14$

II. $n \leq 16$

III. $m + n = 30$

A. I and II only

B. I and III only

C. II and III only

D. I, II and III

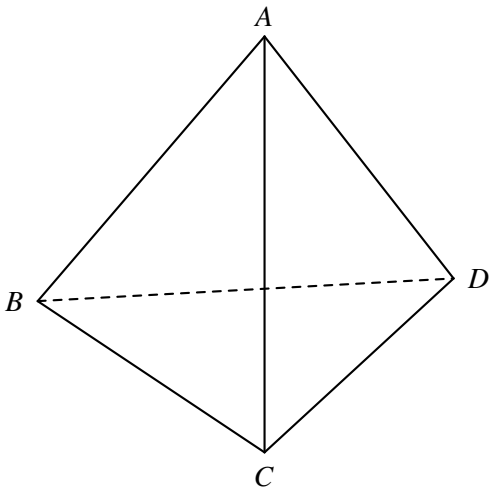

(DSE-2012 PII Q30)

5. The figure shows a regular tetrahedron *ABCD*. Find the angle between the plane *ABC* and the plane *BCD* correct to the nearest degree.

A. 48°

B. 53°

C. 60°

D. 71°

(DSE-2012 PII Q40)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

6. Find the range of values of k such that the circle $x^2+y^2+2x-4y-13=0$ and the straight line $x-y+k=0$ intersect at two distinct points.

A. $-9<k<3$

B. $-3<k<9$

C. $k<-9$ or $k>3$

D. $k<-3$ or $k>9$

(DSE-2012 PII Q42)

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

7. Let m_1, r_1 and v_1 be the mean, the range and the variance of a group of numbers $\{x_1, x_2, x_3, \ldots, x_{100}\}$ respectively. If m_2, r_2 and v_2 are the mean, the range and the variance of the group of numbers $\{x_1, x_2, x_3, \ldots, x_{100}, m_1\}$ respectively, which of the following must be true?

I. $m_1 = m_2$

II. $r_1 = r_2$

III. $v_1 = v_2$

A. I and II only

B. I and III only

C. II and III only

D. I, II and III

8. The box-and-whisker diagram below shows the distribution of the times taken by a large group of students of an athletic club to finish a 100 m race:

The inter-quartile range and the range of the distribution are 3.2 s and 6.8 s respectively.

(a) Find a and b.

(b) The students join a training program. It is found that the longest time taken by the students to finish a 100 m race after the training is 2.9 s less than that before the training. The trainer claims that at least 25% of the students show improvement in the time taken to finish a 100 m race after the training. Do you agree? Explain your answer.

9. Tom conducts a survey on the numbers of hours spent on doing homework in a week by secondary students. Questionnaires are sent out and twenty of them are returned. The stem-and-leaf diagram below shows the numbers of hours recorded in the twenty questionnaires:

Stem (tens)	Leaf (units)
1	0 0 1 1 2 3 4 5 5 6 6 7 7
2	0 0 0 5 8
3	4 6

(a) Find the mean and the median of the numbers of hours recorded in the twenty questionnaires.

(b) Tom receives four more questionnaires. He finds that the mean of the numbers of hours recorded in these four questionnaires is 18. It is found that the numbers of hours recorded in two of these four questionnaires are 19 and 20.

(i) Write down the mean of the numbers of hours recorded in the twenty-four questionnaires.

(ii) Is it possible that the median of the numbers of hours recorded in the twenty-four questionnaires is the same as the median found in (a)? Explain your answer.

10. The standard deviation of the test scores obtained by a class of students in a Mathematics test is 10 marks. All the students fail in the test, so the test score of each student is adjusted such that each score is increased by 20% and then extra 5 marks are added.

(a) Find the standard deviation of the test scores after the score adjustment.

(b) Is there any change in the standard score of each student due to the score adjustment? Explain your answer.

11. The coordinates of the centre of the circle C are $(6, 10)$. It is given that the x-axis is a tangent to C.

(a) Find the equation of C.

(b) The slope and the y-intercept of the straight line L is -1 and k respectively. If L cuts C at A and B, express the coordinates of the mid-point of AB in terms of k.

(7 marks) (DSE-2012 PI Q17)

12. Figure 5(a) shows a right pyramid $VABCD$ with a square base, where $\angle VAB = 72°$. The length of a side of the base is 20 cm. Let P and Q be the points lying on VA and VD respectively such that PQ is parallel to BC and $\angle PBA = 60°$. A geometric model is made by cutting off the pyramid $VPBCQ$ from $VABCD$ as shown in Figure 5(b).

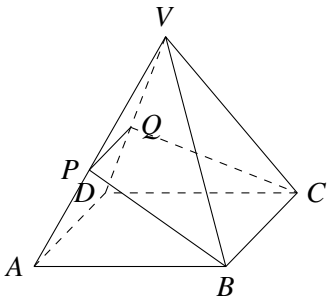

Figure 5(a)

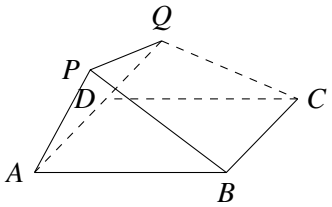

Figure 5(b)

(a) Find the length of AP.

(b) Let α be the angle between the plane $PBCQ$ and the base $ABCD$.

(i) Find α.

(ii) Let β be the angle between PB and the base $ABCD$. Which one of α and β is greater? Explain your answer.

13. In a city, the air cargo terminal X of an airport handles goods of weight $A(n)$ tonnes in the nth year since the start of its operation, where n is a positive integer. It is given that $A(n) = ab^{2n}$, where a and b are positive constants. It is found that the weights of the goods handled by X in the 1st year and the 2nd year since the start of its operation are 254 100 tonnes and 307 461 tonnes respectively.

(a) (i) Find a and b. Hence find the weight of the goods handled by X in the 4th year since the start of its operation.

(ii) Express, in terms of n, the total weight of the goods handled by X in the first n years since the start of its operation.

(b) The air cargo terminal Y starts to operate since X has been operated for 4 years. Let $B(m)$ tonnes be the weight of the goods handled by Y in the mth year since the start of its operation, where m is a positive integer. It is given that $B(m) = 2ab^m$.

(i) The manager of the airport claims that after Y has been operated, the weight of the goods handled by Y is less than that handled by X in each year. Do you agree? Explain your answer.

(ii) The supervisor of the airport thinks that when the total weight of the goods handled by X and Y since the start of the operation of X exceeds 20 000 000 tonnes, new facilities should be installed to maintain the efficiency of the air cargo terminals. According to the supervisor, in which year since the start of the operation of X should the new facilities be installed?

(13 marks) (DSE-2012 PI Q19)
